PROBLEM STATEMENT

Organizing an event can be complex and time-consuming, requiring users to juggle various tasks such as choosing suitable vendors and event managers, sending invitations to guests, and making personalized recommendations. The lack of a streamlined and user-friendly solution often leads to confusion, inefficiencies, and suboptimal event planning.

KEY CHALLENGES

❑ Vendor and Event Manager Selection:
- Users struggle to find and select the right vendors and event managers for their event.
- Matching event's needs and preferences is challenging.

❑ Guest Invitation and Management:
- Coordinating and managing guest lists is cumbersome.
- Sending invitations and tracking RSVPs can lead to errors.

❑ Personalized Recommendations:
- Users lack personalized recommendations for vendors and event managers.
- Matching recommendations with event requirements is difficult.

PROPOSED SOLUTION

- Effortless Vendor and Event Manager Selection
- Streamlined Guest List Management
- Tailored Recommendations
- Data Security and Privacy
- Event Success Metrics
- AI-powered recommendations for personalized event planning.
- Ensures optimal event planning experience.

UNIQUE FEATURE

❑ Smart Vendor and Event Manager Matching: Our system employs advanced algorithms to match users with the most suitable vendors and event managers based on event details, preferences, and past reviews.

❑ Integrated Guest Management: Users can seamlessly manage their guest lists, send invitations via multiple channels, and track responses within a single platform.

❑ AI-Driven Recommendations: Leveraging AI, our system provides personalized recommendations, enhancing the user's ability to make informed decisions.
